## DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

The abstract of the disclosure is objected to because applicant is reminded of the proper language and format for an abstract of the disclosure. The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of **50 to 150 words**. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc. **Correction is required.** See MPEP § 608.01(b)..

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

***Allowable Subject Matter***

2. Claims 36-38 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art fails to show a linearizer comprising an adaptation controller with M monitor signals input thereto and M control settings output therefrom, wherein the adaptation controller first determines M uncorrelated adjustment settings dependent on the M monitor signals, and then adjusts the M control settings using the M uncorrelated adjustment settings as called for in claims 36-38. Therefore, claims 36-38 are presently allowed.
